

SAN PABLO NINAMARCA, BOLIVIA

Community Water System

PROJECT DESCRIPTION

This is a community water system to serve approximately 25 families. The total project cost is estimated at \$25,700 by the Bolivian NGO Suma Jayma, a Bolivian NGO that WEFTA has successfully worked with for several years on many other similar water systems in the altiplano region of Bolivia.

Some of the funding will be made available by the local population and municipality. The portion of the funding that is being requested of WEFTA is \$13,500.

A formal proposal and cost analysis is still pending.
