

VILLAS DE SANTA CLARA, SAN LUIS TALPA EL SALVADOR

Community Water and Wastewater Systems

PROJECT DESCRIPTION

This project consists of the construction of a wastewater collection and treatment system for a community of up to 60 homes, plus a potential water system if agreement is not reached with the neighboring community to provide water. This project would entail a collaborative effort between WEFTA and the Fuller Center for Housing. WEFTA has been coordinating with representatives of the Fuller Center and hope to have a volunteer visit the site at some point in early 2009.

Volunteers at a local blitz build event sponsored by the Fuller Center for Housing pitch in to help
