

PICONES, GUANAJUATO, MEXICO

Community Water System

PROJECT DESCRIPTION

WEFTA has been coordinating with the local Habitat for Humanity representative in Guanajuato, Mexico, and the questionnaire has been submitted to the local leadership for completion. According to Fanny Vasquez, ex-Habitat Director now living in the area, this community is desperately poor and isolated, and the need for safe drinking water in the community is great.

A detailed project proposal and cost estimate is forthcoming.

Typical existing home within the community.
