

# LA FLORIDA, CAÑETE, PERU

## Community Water and Wastewater Systems

### PROJECT DESCRIPTION

---

This is a proposed water and wastewater project for a new community of 448 homes in Cañete, south of Lima. The land has been purchased by the Fuller Center for Housing and it is hoped that home construction will begin soon. The cost of each home will be less than \$5,000, but the lots do not yet have water and wastewater. It is hoped that WEFTA volunteers will be able to make an initial site visit to this community in 2009.

Children of the community  
of La Florida.
